

July 2026 Release Atlas

44 documented builds. 49 delivered capability records. One evidence-scoped system view.

44

documented builds dated in July

13

release days from July 2 to July 31

49

delivered capability records by July 31

AXIS 01 · TIME

Every documented July build, grouped by release day

Daily build count is encoded by the number of labelled build marks - peak: 8 builds on 29 July

AXIS 02 · EVIDENCE LIFECYCLE

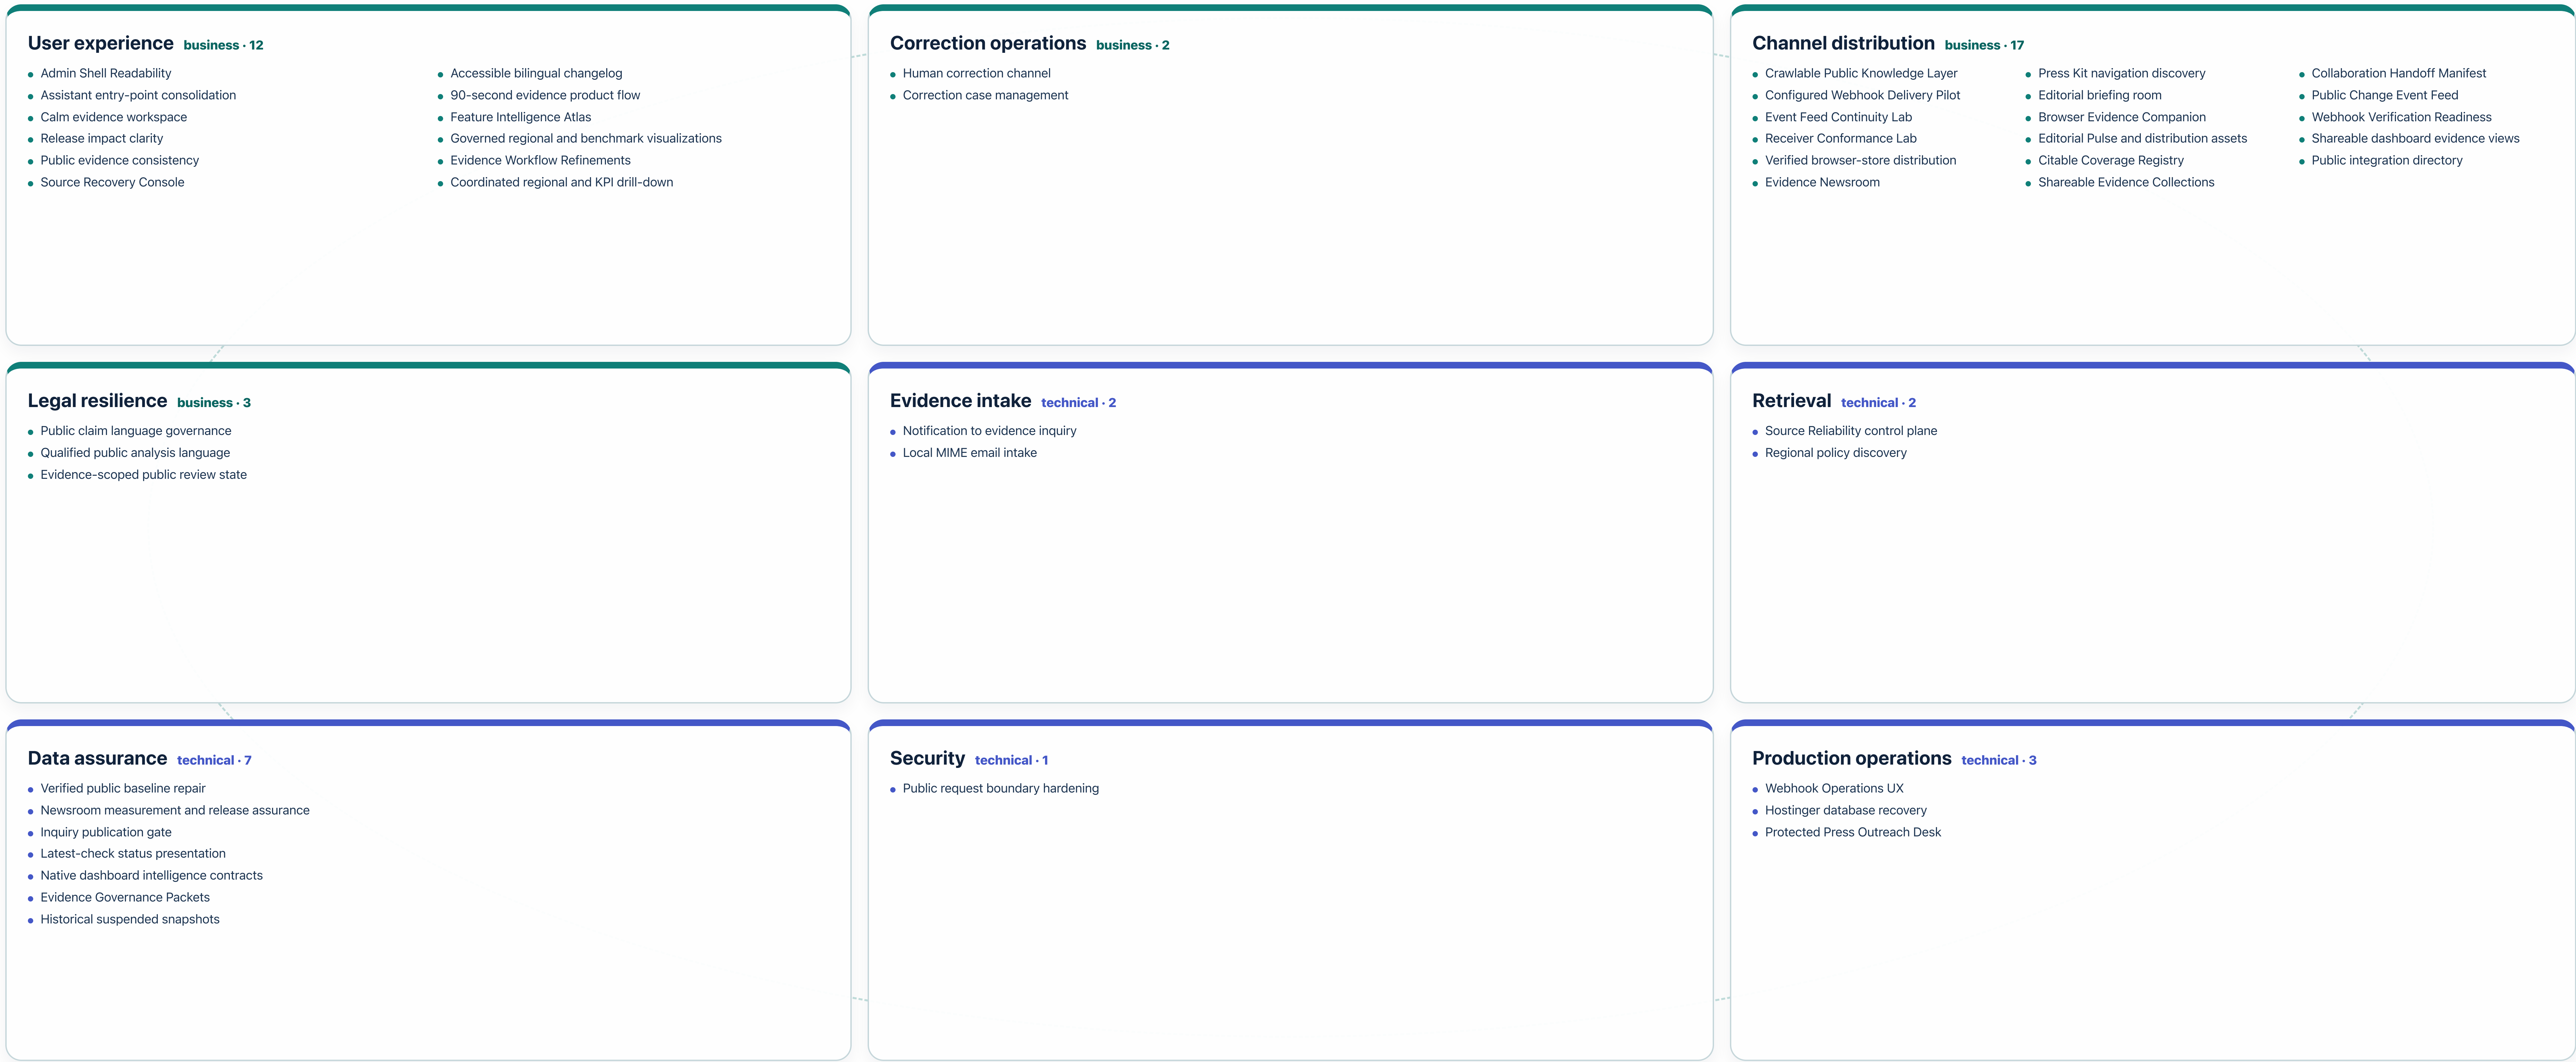

Six bounded stages

- 1 SIGNAL**
A user clue or monitored source enters a bounded workflow.
- 2 DISCOVER**
Candidate URLs remain private until official-source review.
- 3 CAPTURE**
Layered retrieval produces timestamped content and hash evidence.
- 4 QUALIFY**
Text changes, attention signals and QA remain evidence-qualified.
- 5 PUBLISH**
Only gated records reach public views, exports and companions.
- 6 CORRECT**
Accepted cases and scoped operations can review or withhold evidence.

AXIS 03 · CAPABILITY SYSTEM

49 delivered records across nine product domains

Direct labels show the governed inventory; domain color also uses business/technical wording

REFERENCE SCOPE

What the numbers describe

01 AUG 2026 · 3.9.0-beta.27
Operational Readiness consolidation
Shown as the next checkpoint, not included in July totals.

- Operational Action Center
- Publication Readiness Funnel
- Live status cards
- Role-safe Admin/Auditor presentation
- Responsive and accessible operations

Scope boundary
Inventory and implementation counts do not establish exhaustive coverage, measured adoption, compliance, performance, security assurance or independent validation.

DOCUMENTED BUILD LEDGER

44 dated releases, with one primary change label each
